Objective

Full-Stack Web Development student with a strong frontend foundation in React.js, JavaScript, and modern UI development, seeking a **Frontend Developer Intern** role to apply hands-on project experience in building responsive, API-integrated web applications while continuing to grow full-stack skills.

Education

Red and White Skill Education
Diploma in Full Stack Web Development

Bharuch, Gujarat, India
2024 – 2026 (Expected)

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+), JSON
Frontend Frameworks/Libraries: React.js, Redux Toolkit (Basics), Bootstrap, Tailwind CSS
Tools & Platforms: Git, GitHub, Vite, Vercel, VS Code, npm, ESLint
Concepts: REST API Integration, Responsive Web Design, Component-Based Architecture, State Management, Cross-Browser Compatibility, Debugging & Browser DevTools, Environment Variables & API Security

Project Experience

Chef Claude – AI Cooking Assistant | *React 19, Vite, Groq API (LLaMA 3.3-70B), React-Markdown, JavaScript (ES6+)*

- Developed a full-stack React web application integrating the Groq API and LLaMA 3.3-70B LLM to generate AI-powered recipes from user-provided ingredients
- Architected a modular, reusable component structure (Header, MainBody, IngredientsList, ClaudeRecipe) enforcing separation of UI, state, and API logic
- Implemented asynchronous state management using React Hooks for dynamic ingredient lists, loading states, and conditional UI rendering
- Integrated React-Markdown to render AI-generated content as formatted, styled HTML for improved readability
- Secured API keys using environment variables (.env) in line with industry security standards
- Configured Vite build tooling for optimized performance, fast HMR, and production-ready deployment
- [Live Demo](#) | [GitHub Repository](#)

Meme Generator – React Web App | *React 19, Vite, Imgflip API, JavaScript (JSX), CSS3*

- Developed a meme generator web application using React 19 and Vite, enabling real-time text overlay on 1,000+ meme templates fetched via the Imgflip API
- Implemented React Hooks (useState, useEffect) for dynamic state management and asynchronous API data fetching
- Built a random image selector allowing users to instantly swap meme templates with a single click
- Architected a modular component structure (Header, Main) following React best practices for reusability and separation of concerns
- Styled a responsive, mobile-friendly UI with CSS3, including gradient theming and authentic meme typography (Impact font with text-shadow stroke)
- Configured Vite for optimized builds and fast HMR; enforced code quality with ESLint and version-controlled via GitHub
- [Live Demo](#) | [GitHub Repository](#)

Achievements

Participated in a Hackathon organized by Red and White Skill Education, Bharuch, solving timed coding challenges to strengthen problem-solving and programming fundamentals
