Objective

Full-Stack Web Developer with hands-on experience building responsive, API-integrated web applications using React.js, Node.js, Express.js, and MongoDB. Seeking a Full Stack Web Developer Intern role to apply practical development skills and contribute to production-oriented web applications.

Education

Red and White Skill Education

Full Stack Web Development Course

Bharuch, Gujarat, India

2024 – 2026 (Expected)

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, JSON

Frontend: React.js, Redux Toolkit, Tailwind CSS, Bootstrap, Vite

Backend & Databases: Node.js, Express.js, MongoDB, Mongoose

Tools: Git, GitHub, Vercel, VS Code, npm, ESLint

Concepts: REST APIs, Responsive Design, Component-Based Architecture, State Management, Authentication, Environment Variables, Debugging

Project Experience

Chef Claude – AI Cooking Assistant

React 19, Vite, Groq API, LLaMA 3.3-70B, React-Markdown

- Built an AI-powered recipe application using React and the Groq API, generating recipes from user-provided ingredients.
- Implemented reusable React components and Hooks for ingredient management, loading states, conditional rendering, and application state.
- Integrated React-Markdown for formatted AI responses and secured API configuration using environment variables.
- Configured Vite for fast development and production builds. [Live Demo](#) | [GitHub](#)

Meme Generator – React Web App

React 19, Vite, Imgflip API, JavaScript, CSS3

- Developed a responsive meme generator using React and the Imgflip API, providing access to 1,000+ meme templates.
- Implemented useState and useEffect for dynamic text, template selection, random image generation, and API data fetching.
- Created reusable components and responsive CSS styling with mobile-friendly layouts and meme typography.
- Used Vite and ESLint for development and code quality. [Live Demo](#) | [GitHub](#)

Payroll Management System – Full-Stack Web Application

React, Vite, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS

- Developed a full-stack payroll system for managing companies, employees, salary templates, payslips, and payroll history.
- Built protected REST APIs with Node.js, Express.js, MongoDB, Mongoose, and JWT-based administrator authentication.
- Implemented dynamic payslip calculations for earnings, deductions, net salary, and salary amounts in words.
- Generated PDF payslips and bulk ZIP exports using PDFKit and Archiver, with company logo uploads through Multer and Cloudinary.
- Built reusable React components and responsive administrative interfaces for companies, employees, templates, and payslips.
- [Live Demo](#) | [GitHub](#)

Achievements

- Participated in a Red and White Skill Education hackathon, completing timed coding challenges focused on problem-solving and programming fundamentals.
